

- Where engineering is at a Plus Level -

Company Profile

2023

ABOUT US:

Having started as two individual engineers with the help of local senior consultants in the market of North Lebanon, we tried to merge our efforts to provide innovative and cost effective quality solutions in the electro-mechanical and associated building services in the Lebanese market.

Due to the growth and the widespread of our reputation for delivering on our commitments of quality and timely services, we have expanded our reach to some selected projects in Africa and the Middle East;

Therefore, establishing a complete engineering office was the important step we did fourteen years ago, and thus,

In 2002, **LevelPlus** became a formal engineering office involved in electrical and mechanical building construction services and offering the clients the up-to-date standards and technologies within their expected budgets.

In the mid of 2014, **LevelPlus** was registered in the legal frame as an S.A.R.L company with VAT under the following number 601-2961488.

OBJECTIVES:

LevelPlus-s.a.r.l. is committed to continuously improve and develop its engineering services—mechanical trade, using the modern and highest technical standards with research developments.

STANDARDS:

LevelPlus-s.a.r.l. staff commit to any undertaken project from the initial concept up to design, coordination, specification, quantities estimate, bidding, execution, supervision and commissioning;

These services follow reputable & international standards such as:

- National, and Uniform Plumbing Code;
- NF standards for Plumbing Codes;
- ASHRAE and SMACNA Standards for HVAC applications;
- RT-2000 and EN Standards for HVAC applications;
- NFPA Code for Electrical and Fire Fighting systems;
- NEC standard for the electrical systems;
- And many other standards;

SERVICES:

LevelPlus has two major departments:

- 1- *LevelPlus-design department ;*
- 2- *LevelPlus-execution department ;*

LevelPlus design department offers the following services:

Sanitary Storm Drain Services

- Layout of below and above grade piping
- Sewerage plans and details
- Storm pipe sizing, vent sizing and routing
- Reservoirs and water tank details
- Roof drain calculation
- Pump sizing and location

Plumbing Systems

- Plumbing load analysis
- Utility stub outs and pipe sizes
- Plumbing and Drainage Drafting Services
- Design and Drafting services for domestic water
- Pipe sleeve requirements and location
- Chase space requirements
- Water supply and distribution plans and details
- Waste water collection system
- Riser diagrams, details, schematics and schedules
- Plumbing system specifications and bill of quantities
- Legends supplement plumbing construction drafts
- Equipment Schedule

SERVICES: (continued)

HVAC Systems

- Schematic heating and cooling system design
- Heating and cooling equipment selection
- Heat loss and/or gain calculations
- Plant room layout design
- Duct layout drawings
- Riser diagrams, schematics and details
- HVAC systems specifications
- Legend supplement plumbing construction drafts
- Equipment schedule

Fire fighting Systems

- Fire hose reels cabinets and racks design
- Fire sprinklers design and calculation
- Fire riser diagrams and details
- Fire pumps calculation and design
- Fire fighting system specifications
- Equipment schedule

Lighting Systems

- Lighting calculation according to the lux required level.
- Selection of the appropriate lighting fixtures for indoor and outdoor place.
- Make saving studies.

Power Distribution

- Perform cables cross section calculation.
- Selecting the appropriate type of cabling
- Sockets and power outlets
- Assembly of all kinds of electrical panel boards
- Generators and synchronizing panel installation

Fire Alarm System

- Design and selection of the appropriate fire alarm system , conventional and addressable types.
- Perform cabling and installation according to NFPA standards.

SERVICES: (continued)

Data and Network

- Design and installation of data points , server room racks (patch panels , switches,...)

CCTV, Intrusion and Sound Systems

- Selection of cameras and DVR/NVR types and installation.
- Design and installation of sound system

LevelPlus execution department offers the following services:

- Shop drawings of proposed design Layouts;
- Composite drawings for the electro-mechanical trades in coordination with architectural and structural and systems;
- Submittals preparation for required materials and drawings;
- Value engineering and updated proposals for optimum solutions;
- Material supply from manufacturers and local suppliers;
- Paper work preparation and discussion.
- Testing and commissioning under consultant's requests.
- As-built drawings execution;
- Quantity take-off and statements preparation;

- ***Residential Spaces:***

Starting up from small studios and moving up to buildings, villas and renovation of old houses; References upon request (more than 500 projects as of:

Bonanjo high-rise residential building (Cameroon),

Hypodrome Office building (Douala Cameroon),

9Degree mixed-use building (Bastos Cameroon)

Shopping Center and Luxury Motel (Caracas - Venezuela)

Apartments, villas, residential & commercial buildings; References upon request.

PROJECTS LIST:

- ***Commercial and Educational Spaces:***

- Balamand female dormitory execution follow-up and supervision;
- Balamand faculty of medicine follow -up and supervision;
- LAU Koraytem Shannon Hall Bldg. renovation; (180,000 USD)
- LAU Koraytem Faculty Reallocation building; (200,000 USD)
- LAU Jbeil Lab renovation; (30,000 USD)
- Shop drawings and submittals for more than 14 different schools with Geneco and Oger Liban;
- College des Freres, Deddeh, Koura installation of Heating systems; (170,000 USD)
- College des Freres, Deddeh, Koura Sport Center design, follow -up & supervision; (mechanical 600,000 USD, electrical 400,000 USD)
- Usek Kaslik Zouki Restaurant, design, follow -up and supervision;
- Usek Kaslik Library, design and execution; (350,000 USD)
- Treasure Island at City Mall Beirut; design and execution (electrical 250,000 USD)
- Restaurant the Butcher: electrical design & execution 50,000 USD
- Monoprix Jemayzeh: (electro-mechanical 350,000 USD)
- Damour Beach Resort: (electro-mechanical 650,000 USD)
- Jeita Mall (electro-mechanical 875,000 USD)
- BHV Jnah (electrical 550,000 USD)
- Wahat Al Farah educational farm full design and execution.

And many more...

PROJECTS LIST: (continued)

- ***Beach Resorts and Sport Centers:***

Expanded on the nice sea of Lebanon such as:

- Cyan beach resort, Jounieh - Kaslik, follow-up and supervision.
- Saint Georges beach resort partial renovation, Beirut, follow-up and supervision
- College des Freres Deddeh-Full design of MEP, with supervision and follow-up.

- ***Hotels, Motels & Dormitories:***

- 3 stars and 4 stars hotels in Nigeria, Africa; design
- Koura residence, a private dormitory next to Balamand university; follow-up and supervision

- ***Residential complex:***

- A residential complex of 35 villas located in Bhamdoun, Mount Lebanon; Design, supervision, follow up and coordination.
- Belmond village, (18 villas complex), Kalhat-Koura, North Lebanon, full MEP design and execution.

- ***Industrial Spaces:***

- Located in Bsarma, Al Koura, North Lebanon, a pellets, cream and aerosol factories are well electro-mechanical designed, coordinated and followed up for a full execution;
- Hawa Chicken Poultry killing and feathering plant, Anfeh, Koura, North Lebanon, Mechanical and Plumbing design, follow-up and execution.

- ***Health Care Facilities:***

- Dar Al Chifa Hospital, a large hospital in North-Lebanon with full facilities for all modern medical services.
- Al Habtour Hospital, a medium size hospital in Akkar-Lebanon with the highest technologies and facilities for an ultra medical services.
